

## **COHRED Report of Activities 2002**

The 2002 COHRED Report of Activities provides an insight into the strategic planning process - one of COHRED's main activities - which took place during the year. The revitalisation of COHRED's vision and the planning of a renewed strategy went hand in hand with COHRED's commitment to maintain support for existing activities at country and regional level. This report therefore illustrates how COHRED's activities have been implementing certain of the key objectives of the new strategic direction.
